Is Book Ko Kaise Use Karein

Ek chhota sa user manual, taaki aap kahin atak na jaayein.

Yeh book ek **kaam karne wali guide** hai. Isko novel ki tarah ek baar padh kar rakh dena aapke liye kam kaam aayega. Behtar yeh hai ki aap ek chapter padhein, uska prompt ChatGPT ya Claude mein chalayein, result check karein, aur phir agle chapter par jaayein.

Book ka seedha raasta

Poori book ek hi workflow ke around bani hai:

1. **Research & topic selection** CHATGPT
   Audience, problems, competitors, validation
2. **Book blueprint** CHATGPT
   Structure, chapter briefs, reviewed and approved by you
3. **Claude production brief** CHATGPT → CLAUDE
   Approved blueprint + research notes become one master prompt
4. **Complete eBook PDF** CLAUDE
   Written, designed and exported as a real PDF file
5. **Quality check** YOU + AI
   Facts, layout, links, mobile reading, honest claims
6. **Listing & checkout** SUPERPROFILE
   Product page, price, file upload, test purchase
7. **Marketing & learning** INSTAGRAM (+ OPTIONAL ADS)
   Content, links, metrics, improvements

Har step ka output agle step ka input banta hai. Isliye **steps skip mat kijiye**. Sabse common galti yeh hoti hai ki beginner topic research skip karke seedha “ek eBook likh do” bol deta hai. Phir ek generic PDF banti hai jo kisi ko nahi chahiye.

Prompt IDs ka system

Is book mein 100 se zyada prompts hain. Har prompt ka ek ID hai, jaise `TR-01` ya `SL-01`. Pehle do letters batate hain ki prompt kis kaam ka hai:

Code	Category	Kab use hota hai
TR, TV, MC	Topic research, validation, competitor research	Part 2
TP, RP, BS, BR	Title, research planning, book structure, blueprint review	Part 2-3
CM, CP	Claude brief aur Claude production	Part 4

CHAPTER 04

The Master Prompt for AI Topic Research

Ek hi prompt jo ChatGPT ko niche se shortlist tak ka poora research karwaata hai, evidence ke saath.

Yeh prompt kya karta hai

Master prompt ChatGPT ko ek disciplined research analyst bana deta hai. Woh 15 kaam karta hai: niches explore karna, audience aur problems dhoondhna, topic ideas banana, competitors dekhna, differentiation sochna, difficulty aur beginner-suitability tolna, buyer-intent ka evidence dhoondhna, scoring, ranking aur shortlist dena, aur har step mein **fact, hypothesis aur assumption alag** rakhna.

Isse aapko promise nahi milta ki topic bikega. Isse aapko ek **informed decision** milta hai: kaun se 3 topics ko aage jaanch karna hai.

Scoring framework (prompt mein built-in)

Har topic ko 5 criteria par 1-5 score milta hai (max 25):

Criterion	Sawaal	Score
Audience clarity	Kya audience specific hai aur mujhe pata hai woh kahan hai?	1-5
Problem urgency	Kya problem baar-baar aati hai aur pareshan karti hai?	1-5
Evidence of paid interest	Kya paid products ya paise dene ka koi evidence hai?	1-5
Differentiation chance	Kya mere paas ek alag angle hai?	1-5

Criterion	Sawaal	Score
Ease for me to create	Kya main bina professional license ke, accurately bana sakta hoon?	1-5

IMPORTANT NOTE · SCORE KA MATLAB

Score sirf comparison ke liye hai. 20+ score ka matlab “bikega” nahi hota, matlab “agle step (validation) ke liye yeh topic best hai”.

PROMPT ID TR-01

Master Topic Research Prompt

PURPOSE	Niche se shortlist tak ek structured, evidence-labeled research report banana, jisse aap 3 topics ko validate karne ke liye chun sakein.
WHEN TO USE	Jab aapke paas ek rough audience ya interest area ho, aur aap eBook topic decide karna chahte hain. Part 2 ka pehla bada prompt.
WHERE TO USE	ChatGPT (web search ya deep research ON)
REQUIRED INPUTS	• Aapke interests, skills, ya experience (3-5 lines) • Rough audience idea (ek line bhi chalegi) • Aapka comfort level: kya aap kisi professional topic mein hain? • Kya aap sirf India ko target kar rahe hain?
BEFORE YOU PASTE	Agar aapke ChatGPT plan mein deep research hai, to usko on karke yeh prompt chalayein. Research plan dikhe to review karein, aur approve karne se pehle check karein ki “Indian sources prefer karo” jaisa instruction ho.

COPY-AND-PASTE PROMPT

ROLE: Tum ek senior digital-product research analyst ho. Tum evidence-based kaam karte ho aur kabhi sources, statistics, ya sales numbers invent nahi karte.

CONTEXT:

- Main ek beginner hoon jo ek paid eBook (PDF) bana kar online bechna chahta hoon.
- Mere interests/skills: **[YOUR INTERESTS AND SKILLS]**

- Rough audience idea: **[ROUGH AUDIENCE OR "none yet"]**
- Market focus: **[India / India + international]**
- Language of product: Hinglish (Roman script)
- Topics jo main avoid karna chahta hoon: **[e.g. medical advice, investment tips, legal advice]**

TASK (har step ka output alag heading mein do):

1. NICHES: Mere interests se 8 realistic niches explore karo.
2. AUDIENCES: Har niche ke liye ek specific audience likho (stage, occupation, situation).
3. PROBLEMS: Har audience ki 3 recurring problems likho jo ek PDF guide se solve ho sakti hain.
4. TOPIC LIST: Kul 30 specific eBook topic ideas banao (broad nahi, specific). Har idea ke saath uska product angle likho.
5. COMPETING PRODUCTS: Web search se har top-10 idea ke liye 2-3 publicly listed competing products dhoondho (title, platform, public price, URL). Jo nahi mile uske liye "not found" likho.
6. DIFFERENTIATION: Har top-10 idea ke liye ek aisa angle batao jo competition se alag ho aur main original bana sakun.
7. CREATION DIFFICULTY: Har idea ko Easy / Medium / Hard rate karo, aur likho kyun (kya research chahiye, kya risk hai).
8. BEGINNER SUITABILITY: Kya ek beginner is topic par accurate content bana sakta hai bina license ya credentials ke? Agar topic sensitive hai (health, legal, financial), to saaf flag karo.
9. BUYER INTENT EVIDENCE: Public evidence dhoondho ki log is topic par paid solutions khareed rahe hain (competitor reviews, public price, repeated searches, community questions). Evidence ko 1-5 level par rate karo: 1=sirf AI opinion, 2=public interest, 3=paid competitor exists, 4=direct audience confirmation, 5=pre-sell/waitlist signal.
10. SCORING: Har top-10 idea ko 5 criteria par 1-5 score do (audience clarity, problem urgency, evidence of paid interest, differentiation chance, ease for me to create) aur total /25 likho. Score ke reasons likho.
11. LIMITATIONS: Is research ki limitations batao. Kya verify nahi ho paya? Kahan sirf assumptions hain?
12. RANKING: Top 10 ko rank karo.
13. SHORTLIST: Top 3 ki shortlist do aur har ek ke liye alag se explain karo kyun.
14. VALIDATION STEPS: Har shortlisted topic ke liye 5 concrete validation steps do jo main khud kar sakun (jaise 5 logon se baat, preview post, waitlist).

15. FINAL NOTE: Saaf likho ki yeh analysis profitability ki guarantee nahi hai.

STRICT RULES:

- Har statement ke saath label lagao: **[FACT: source URL]**, **[HYPOTHESIS]**, ya **[ASSUMPTION]**.
- Koi bhi statistic, market size, revenue ya URL invent mat karo. Agar source nahi mila to "evidence not found" likho.
- Kisi competitor ki content ya sales copy copy mat karo.
- Medical, legal ya financial topics ko tab hi suggest karo jab educational-only angle ho, aur risk note do.

OUTPUT FORMAT: Headings, tables jahan useful, aur end mein ek "Source list" jisme sirf wahi URLs hon jo tumne actually dekhe.

CUSTOMIZATION INSTRUCTIONS	• [YOUR INTERESTS AND SKILLS]: Jo cheezein aap sach mein jaante hain ya seekhna chahte hain. • [ROUGH AUDIENCE]: Kuch pata nahi hai to “none yet” likhein, AI explore karega. • Topics to avoid: Sensitive topics se bachna hai to yahan likhein.
EXPECTED OUTPUT	• 8 niches, 30 topic ideas, top-10 ki competitor table aur scoring table. • Top 3 shortlist, limitations aur validation steps. • Source list.
HOW TO CHECK THE OUTPUT	• Har URL manually kholein (kam se kam top 5). • Kya “FACT” tag ke saath sach mein source diya hai? • Kya scoring ke reasons logical hain, ya sirf generic? • Kya shortlist ke topics aapke interest aur ability se match karte hain?
COMMON MISTAKES	• Prompt bina web search ke chalana. Tab competitor aur evidence wale hisse kamzor honge. • Sirf AI ke score par topic final kar dena. • Top 3 ke bajay 30 topics ko validate karne ki koshish.
NEXT STEP	Shortlisted 3 topics ko Chapter 5 ki topic library se compare karein, phir Chapter 6 ka TV-01 prompt chalayein.

ACTION STEP · AAPKA KAAM

1. TR-01 chalayein.
2. Top 5 URLs khol kar verify karein.
3. Shortlist ko apni spreadsheet ke “Topic Score” sheet mein paste karein.
4. Dekhein ki kya aap khud us topic mein interested hain. 2-3 mahine tak usi audience ke liye content banana hoga.

CHAPTER 05

100+ eBook Topic Ideas

105 alag ideas, 15 categories mein. Inko "bikne wale topics" mat samjhiye. Inko validation ke liye starting points samjhiye.

Is library ko kaise use karein

Har idea mein 6 cheezein hain: working title, audience, problem, unique angle, format, aur ek **"Validate first"** note jo batata hai ki eBook banane se pehle kya check karna hai. Yeh titles **working titles** hain, final nahi.

CAUTION · SENSITIVE CATEGORIES

Fitness, personal finance aur spirituality ke ideas **sirf educational aur general-awareness** angle ke hain. Inhe medical, investment ya legal advice ki tarah mat likhiye. Agar aap in topics par likhein to har jagah "yeh general jaankari hai, professional advice nahi" ka note dein, aur kisi bhi specific health, stock ya legal claim se bachein.

ACTION STEP · LIBRARY KA USE

1. 3-5 ideas chunein jo aapke interest aur ability se match karte hon.
2. Unhe TR-01 ya TV-01 mein daalein.
3. Idea ko seedha copy mat kariye. Apna angle jodiye.
4. Chapter ke end ke Bonus B mein saare ideas ki ek scoring sheet hai.

AI Tools and Productivity

T001 ChatGPT se Roz ke Kaam: 30 Practical Workflows

Audience: Working professionals jo AI use karna chahte hain · **Problem:** Samajh nahi aata AI ko kaam mein kaise lagayein

Angle: Har workflow ek hi page par: prompt + check + result · **Format:** Workbook PDF

Validate first: *5 professionals se poochhein ki unke 3 sabse time-lene wale kaam kaun se hain*

T002 AI se Email Likhna: Office ke 20 Common Situations

Audience: Freshers aur non-native English users · **Problem:** Professional email likhne mein dar

Angle: Hinglish explanation + English templates · **Format:** Template pack

Validate first: *Public job-group questions dekhein ki email related kya poochha jaata hai*

T003 Meeting Notes se Action List Banana AI se

Audience: Team leads aur freelancers · **Problem:** Meetings ke baad kaam bhool jaate hain

Angle: Ek 3-step prompt system · **Format:** Checklist + prompts

Validate first: *Pata karein log notes kahan likhte hain (Notion, WhatsApp, paper)*

T004 AI Prompt Basics for Complete Beginners

Audience: Non-technical adults · **Problem:** Prompts likhna nahi aata

Angle: 10 prompt patterns with before/after · **Format:** Mini guide

Validate first: *Free videos dekhein: kya woh Hinglish mein hain?*

T005 AI se Spreadsheet aur Excel ke Formulas Samajhna

Audience: Students aur office staff · **Problem:** Formula yaad nahi rehte

Angle: Problem se formula tak ka prompt flow · **Format:** Cheat sheet + examples

Validate first: *Dekhein ki Excel ke sawaal kitne common hain community groups mein*

T006 AI ke Jawab Check Kaise Karein: Fact-Check Guide

Audience: Students aur content creators · **Problem:** AI ke galat jawab pakadna nahi aata

Angle: 7-step fact-check routine · **Format:** Checklist guide

Validate first: *5 logon se poochhein kya unhone kabhi AI ki galti pakdi*

T007 AI Tools ka Personal Workspace: Notes, Tasks, Prompts

Audience: Self-learners · **Problem:** Prompts aur notes bikhre hue hain

Angle: Folder system aur naming rules · **Format:** System guide

Validate first: *Dekhein ki Notion/Docs templates ka paid demand hai ya nahi*

CHAPTER 11

The Ultimate Claude eBook Generation Prompt

Ek reusable master prompt. Isme topic, audience aur design badal kar kisi bhi eBook ke liye use karein.

Yeh prompt kaise kaam karta hai

Is prompt ka maksad hai Claude ko ek **author, researcher, editor aur designer** ki tarah kaam karwana, aur ek actual PDF file nikalwana. Yeh prompt strict hai: **proposal ya short sample ki ijaazat nahi**. Agar book lambi hai aur ek response mein poori nahi aati, to Claude ko stages mein kaam karna hai, ek master outline aur ek design spec ke saath, aur end mein ek **consolidated PDF** banana hai.

Customizable placeholders ki list

Placeholder	Kya likhein
Book title, subtitle	Final title aur subtitle
Topic, audience, problem, outcome	Specific audience aur reader ki main problem
Language	Easy Hinglish (Roman script) ya kuch aur
Tone and style	Friendly, practical, honest
Research materials	Notes, source list (attach ya paste)
Approved table of contents	BR-07 ka final TOC
Chapter requirements, depth	Har chapter ke purpose aur length
Examples and exercises	Examples ka type, exercises ka format
References	Source list format

FREE SAMPLE KE BAAD

Poori Book Mein Kya Milta Hai

- 25 chapters, 8 parts: topic research se listing tak
- 100+ copy-paste prompts (ChatGPT aur Claude ke liye)
- 100+ eBook topic ideas aur scoring sheet
- Claude se poori PDF banane ka Master Prompt
- PDF quality control aur final review checklist
- SuperProfile listing, pricing aur launch ka plan
- Instagram marketing prompts aur 30-day action plan
- Low sales hon to diagnose karne ka tareeka
